

**2016 HISTORIC PRODUCT CONTENT LABEL
WindPower from WGL Energy for Large Commercial Customers**

WindPower from WGL Energy is a renewable energy certificate (REC) product. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. If you purchase electricity from WGL Energy with RECs paired to a percentage of your load then your price includes the cost of this REC product, otherwise your electricity will be billed separately. Learn more at www.wglenergy.com/RECs.

WindPower from WGL Energy is sold in blocks of 1000 kilowatt-hours (kWh). Each 1000 kWh is equal to one REC. In 2016, the product was made up of the following renewable resources.

Green-e Energy Certified New ¹ Renewables in WindPower from WGL Energy		Generation Location
-Wind	100%	TX: 100%
TOTAL ²	100%	TX: 100%

1. New Renewables come from generation facilities that first began commercial operation in the last 15 years.
2. These figures represent the resource mix of the RECs delivered to WindPower from WGL Energy customers in 2016.

For comparison, the average (2014) mix of energy sources supplying the US includes: Coal (39%), Nuclear (19%), Natural Gas (27%), Hydropower (6%), Wind (4.4%), Biomass (1.7%), Petroleum (1%), other Renewables (~1%), and other gases (<1%) (from U.S. Department of Energy/Energy Information Administration).
