

2020 HISTORICAL PRODUCT CONTENT LABEL
100% CleanSteps® WindPower from WGL Energy

CleanSteps® WindPower covers 100% of your electricity usage, and is composed of 100% wind energy. A percentage of this product’s renewable content, listed below, is satisfied by renewable portfolio standard (RPS) state-mandated renewables that also meet Green-e Energy eligibility rules. 100% of the product’s renewable electricity content is Green-e Energy certified.

From January 1, 2020 to December 31, 2020, CleanSteps® WindPower was made up of the following new renewable resources averaged annually. The proportion and generation location of the Green-e Energy eligible mandated renewables differs based on where the customer is located and the RPS rules in that state.

Green-e Energy Eligible New¹ Renewables in 100% CleanSteps WindPower

Content for customers located in:	Resource Type	Voluntary Renewables	Voluntary Generation Location	Green-e Energy Certified Eligible Renewables	Green-e Energy Certified Eligible Generation Location	Total Green-e Energy Certified New Renewables
Delaware ²	Wind	100%	PA: 100%	0%	N/A	100%
District of Columbia ²	Wind	82.175%	PA: 100%	17.8250%	PA: 100%	100%
Maryland ²	Wind	78%	PA: 100%	22%	PA: 100%	100%

1. New Renewables come from generation facilities that first began commercial operation within the past 15 years.
2. These figures represent the resource mix of the electricity delivered to 100% Clean Steps WindPower from WGL Energy customers in 2020.

For comparison, the current average mix of resources supplying the PJM Interconnection includes: Natural Gas (36.6%), Nuclear (33.9%), Coal (23.8%), Wind (2.9%), Hydroelectric (1.3%), and Other (1.5%). This resource mix was prepared in accordance with the PJM Environmental Information Services website: <http://www.pjm-eis.com>.

The average home in the United States uses 877 kWh per month. [Source: U.S. EIA 2019]
