

2021 HISTORICAL PRODUCT CONTENT LABEL
50% PA WindPower from WGL Energy

PA WindPower covers 50% of your electricity usage and is composed of 50% windenergy. A percentage of this product's renewable content, listed below, is satisfied by renewable portfolio standard (RPS) state-mandated renewables that also meet Green-e Energy mandated rules. 100% of the product's renewable electricity content is Green-e Energy certified.

From January 1, 2021 to December 31, 2021, PA WindPower was made up of the following new renewable resources averaged annually. The proportion and generation location of the Green-e Energy mandated renewables differs based on where the customer is located and the RPS rules in that state.

Green-e Energy Mandated New¹ Renewables in 50% PA WindPower

Resource Type	Voluntary Renewables	Voluntary Generation Location	Green-e Energy Certified Mandated Renewables	Green-e Energy Certified Mandated Generation Location	Total Green-e Energy Certified New Renewables
Wind ²	92.2%	100%: PA	7.8%	100%: PA	100%

1. New Renewables come from generation facilities that first began commercial operation within the past 15 years.
2. These figures represent the resource mix of the electricity delivered to 50% PA WindPower from WGL Energy customers in 2021.

For comparison, the current average mix of resources supplying the PJM Interconnection includes: Natural Gas (38.3%), Nuclear (18.9%), Coal (21.8%), Wind (9.2%), Hydroelectric (6.3%), and Other (5.5%). This resource mix was prepared in accordance with the PJM Environmental Information Services website: <http://www.pjm-eis.com>.

The average home in the United States uses 893 kWh per month. [Source: U.S. EIA 2020]
