

**2024 PROSPECTIVE PRODUCT CONTENT
LABEL¹ 100% CleanSteps® WindPower from**

CleanSteps® Wind Power covers 100% of your electricity usage and is composed of 100% wind energy. A percentage of this product’s renewable content, listed below, is satisfied by renewable portfolio standard (RPS) state-mandated renewables that also meet Green-e Energy eligibility rules. 100% of the product’s renewable electricity content is Green-e Energy certified.

In 2024, CleanSteps® Wind Power will be made up of the following new renewable resources averaged annually. The proportion and generation location of the Green-e Energy eligible mandated renewables differs based on where the customer is located and the RPS rules in that state.

Green-e Energy Eligible New ² Renewables in 100% CleanSteps Wind Power						
Content for customers located in:	Resource Type	Voluntary Renewables ³	Voluntary Generation Location	Green-e Energy Eligible Mandated Renewables ³	Green-e Energy Eligible Mandated Generation Location	Total Green-e Energy Certified New Renewables
Delaware	Wind	100%	OH, PA, or WV	0%	N/A	100%
District of Columbia	Wind	70.1%	OH, PA, or WV	29.9%	OH, PA, or WV	100%
Maryland	Wind	75.4%	OH, PA, or WV	24.6%	OH, PA, or WV	100%

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

3. The proportion of Voluntary Renewables and Green-e Energy Eligible Mandated Renewables for the District of Columbia and Maryland may vary due to RPS changes.

For comparison, the current average mix of resources supplying the PJM Interconnection includes Nuclear (8%), Coal (10%), Natural Gas (33%), Petroleum (36%), Renewable Energy (13%). This resource mix was prepared in accordance with the PJM Environmental Information Services website: <http://www.pjm-eis.com>.

The average home in the United States uses 889 kWh per month. [Source: U.S. EIA 2023]
