

**2024 PROSPECTIVE PRODUCT CONTENT
LABEL¹ WindPower from WGL Energy**

Renewable Energy Certificates (RECs) do not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. WindPower from WGL Energy is a Green-e Energy certified REC product. Green-e Energy has only certified the RECs, which may be sourced from outside of your local electricity distribution area. If you purchase electricity from WGL Energy with RECs paired to a percentage of your load then your price includes the cost of this REC product, otherwise your electricity will be billed separately. Learn more at www.wglenergy.com/RECs.

WindPower from WGL Energy is sold in blocks of 1,000 kilowatt-hours (kWh) or matches a percentage of your electricity usage. In 2024, WindPower from WGL Energy will be made up of the following renewable resources.

Green-e Energy Certified New ² Renewables in WindPower from WGL Energy		Generation Location
-Wind	100%	100%: National
TOTAL	100%	

1. These figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the RECs you purchased.

2. New Renewables come from generation facilities that first began commercial operation in the last 15 years.

For comparison, the mix of energy sources supplying the US in 2022 includes: Natural Gas (33%), Coal (10%), Nuclear (8%), Petroleum (36%), Renewable Energy (13%). (U.S.EIA).

For specific information about this product, please contact WGL Energy by phone at 1-844-4ASKWGL (1-844-427-5945), or by email at info@wglenergy.com. You can also visit our website at www.wglenergy.com.

WindPower from WGL Energy is Green-e Energy Certified and meets the environmental and consumer protection standards set forth by the non-profit Center for Resource Solutions. Learn more at www.green-e.org.
