

2022 HISTORICAL PRODUCT CONTENT LABEL
National WindPower from WGL Energy

Renewable Energy Certificates (REC) do not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. National WindPower from WGL Energy is a Green-e Energy certified REC product. WGL Energy is also supplying your electricity. Green-e Energy has only certified the RECs, which may be sourced from outside of your local electricity distribution area. Learn more at www.wglenergy.com/RECs.

The product you purchased is sold in blocks of 1000 kilowatt-hours (kWh). Each 1,000 kWh is equal to one REC. In 2022, National WindPower was made up of the following renewable resources.

| Green-e Energy Certified New ¹ Renewables in National WindPower 2022 | | Generation Location |
|---|------|----------------------|
| -Wind | 100% | OH: 0.42% TX: 99.58% |
| Total Green-e Energy Certified Renewables ² | 100% | OH: 0.42% TX: 99.58% |

1. New Renewables come from generation facilities that first began commercial operation within the past 15 years.
2. These figures represent the resource mix of the RECs delivered to National WindPower from WGL Energy customers in 2022.

For comparison, the mix of energy sources supplying the US in 2019 includes: Natural Gas (38.4%), Coal (21.9%), Nuclear (18.9%), Wind (9.2%), Hydropower (6.1%), Solar (0.3%), Other (5.5%). (U.S. EIA).

The average home in the United States uses 886 kWh per month. [Source: U.S. EIA 2021]
