

**2022 HISTORICAL PRODUCT CONTENT LABEL
50% CleanSteps® WindPower from WGL Energy**

CleanSteps® WindPower from WGL Energy matches 50% of your estimated electricity usage. In 2022, CleanSteps® WindPower was made up of the following new renewable resources averaged annually.

Green-e Energy Certified New ¹ Renewables in CleanSteps® WindPower 2022	100%	Generation Location
-Wind	100%	PA: 75.50% OH: 24.50%
Total Green-e Energy Certified New Renewables ²	100%	PA: 75.50% OH: 24.50%

1. New Renewables come from generation facilities that first began commercial operation within the past 15 years.
2. These figures represent the resource mix of the electricity delivered to 50% Clean Steps WindPower from WGL Energy customers in 2022.

For comparison, the current average mix of resources supplying the PJM Interconnection includes Natural Gas (38.4%), Nuclear (18.9%), Coal (21.9%), Wind (9.2%), Hydroelectric (6.1%), and Other (5.5%). This resource mix was prepared in accordance with the PJM Environmental Information Services website: <http://www.pjm-eis.com>.

The average home in the United States uses 886 kWh per month. [Source: U.S. EIA 2021]
