

2023 HISTORICAL PRODUCT CONTENT LABEL
WindPower from WGL Energy for Large Commercial Customers

Renewable Energy Certificates (RECs) do not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. WindPower from WGL Energy is a Green-e Energy certified REC product. Green-e Energy has only certified the RECs, which may be sourced from outside of your local electricity distribution area. If you purchase electricity from WGL Energy with RECs paired to a percentage of your load then your price includes the cost of this REC product, otherwise your electricity will be billed separately. Learn more at www.wglenergy.com/RECs.

WindPower from WGL Energy is sold in blocks of 1000 kilowatt-hours (kWh). Each 1000 kWh is equal to one REC. In 2023, the product was made up of the following renewable resources.

Green-e Energy Certified New ¹ Renewables in WindPower from WGL Energy		Generation Location
-Wind	100%	TX:61.22% ND:9.42% KS:6.03% SD:1.44% OK:18.77% PA:0.09% NE:0.86% MN:2.17%
TOTAL ²	100%	

1. New Renewables come from generation facilities that first began commercial operation in the last 15 years.
2. These figures represent the resource mix of the RECs delivered to WindPower from WGL Energy customers in 2023.

For comparison, the mix of energy sources supplying the US includes Natural Gas (43%), Coal (16%), Nuclear (18%), Solar (4%), Wind (10%), Other (8%). (U.S.EIA).
