

2020 PROSPECTIVE PRODUCT CONTENT LABEL¹
National WindPower from WGL Energy

Renewable Energy Certificates (REC) do not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. National WindPower from WGL Energy is a Green-e Energy certified REC product.

WGL Energy is also supplying your electricity. Green-e Energy has only certified the RECs, which may be sourced from outside of your local electricity distribution area. Learn more at www.wglenergy.com/RECs.

National WindPower matches 100% of your electricity usage. Each 1,000 kWh is equal to one REC. In 2020, National WindPower will be made up of the following renewable resources.

Green-e Energy Certified New ² Renewables in National WindPower 2020		Generation Location
-Wind	100%	100%: National
Total Green-e Energy Certified Renewables	100%	100%: National

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the RECs you purchased.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the mix of energy sources supplying the US in 2017 includes: Natural Gas (32.1%), Coal (29.9%), Nuclear (20.0%), Hydropower (7.4%), Wind (6.3%), Biomass (1.6%), Solar (1.3), Other (1.4%). (from U.S. Department of Energy/Energy Information Administration).

The average home in the United States uses 867 kWh per month. [Source: U.S. EIA 2017]
